Join us for a **2-day** Obstructive Sleep Apnea (OSA) Symposium in **Aarhus, Denmark**, hosted by the Danish ENT Academy. **This symposium** will provide an up-to-date overview of the surgical and diagnostic management of obstructive sleep apnea, covering everything from patient selection to postoperative care.

Key themes include:

- Advances in palate surgery and hypoglossal nerve stimulation implants
- Robotic and minimally invasive techniques
- DISE and complex airway diagnostics in adults and children
- Pediatric OSA: phenotypes, surgical pathways, and management of persistent OSA
- Orthodontic treatment options for OSA - patient selection and outcomes in adults and children

A dedicated technical workshop provides hands-on training in cardio-respiratory monitoring, artefact recognition, and autoscore accuracy, ensuring direct clinical relevance for both hospital and private ENT specialists.

Don't miss this chance to advance your expertise.
